Back to Back Module**Double Back to Back Module****Possible Module Combinations**

B Cube Galaxy

Important Information

* Rain water drainage and outlet point varies depending on system projections. Please contact your account manager for an accurate information and details on this matter.

* There is a natural slope for excess water to be drained, therefore there will be a level of difference between the front and back height. Please contact your account manager for an accurate information and further detail on this matter.

* In order for the excess rain water to be drained correctly from system's rain drainage outlet points and our system requires levelled surface installation. Under that reason the system projection direction must be advised to you by our technical department. To avoid any discrepancy please contact your account manager.

- Here are the standard combination of louver LEDS with a fee you can add to the empty louvers.

- The lighting systems on the product

Width: Upto 2000 mm
Single module led's are used

Width: Above 2000 mm
Duel module led's are used

* All dimensions shown above are in millimeters.
